WORK EXPERIENCE

Citiustech Healthcare Company Pvt. Ltd
Software Engineer

📅 Nov 2022 – Present   📍 Navi Mumbai, India

- Contributed to end-to-end features and APIs, enabling data manipulation (addition, deletion, retrieval) on the server side within production applications.
- Achieved **80% test code coverage** using Junit and Mockito to fortify code quality and improve server-site reliability.
- Facilitated custom code certification for client migration, ensuring a smooth transition from CentOS 7 to RHEL 8.
- Implemented comprehensive user management systems to handle user accounts efficiently.
- Prioritized web security by applying best practices to safeguard user data and site integrity.
- Managed large backend codebase and mentored a team of skilled engineers, while working in a challenging environment
- Led Karaf update initiatives for custom code, successfully migrating 35 repositories from Karaf 4.0.4 to 4.4.3, ensuring seamless compatibility and enhanced performance.
- Designed database schema to store data in an organized manner and created RESTful APIs to store/retrieve data from database efficiently.
- Implemented Prometheous for collecting server matrices and and logs to monitor application on production and integrated all the matrices with Grafanna to visualize data through the clear and effective dashboards.

Citiustech Healthcare Company Pvt. Ltd
Trainee Software Engineer

📅 Nov 2021 – Oct 2022   📍 Navi Mumbai, India

- Completed all the training's and programs and successfully cleared all the client interviews to get billings.
- Worked on the cypress certification and deployed cypress on virtualized environment for client certification
- Successfully mitigated Sonar violations and rectified Exceptions within custom code Engaged with 22 repositories, systematically resolving bugs while fortifying code integrity through the implementation of targeted Junit tests.
- Extensively used Git for version control and regularly pushed code on bitbucket.
- worked on internal activity to showcase the internal team leads as 110 initiative and introduced it to the client.
- Implemented Prometheous and grafana with the application to monitor the server matrices and logs for production.
- Implemented Prometheus and Grafana with the application to monitor the server matrices and logs for production just adding the text here.

SKILLS

OOPS   DSA   Networking   Java
Collection   Hibernate   Spring Boot
MySQL   REST API   Microservices
JUNIT   Mockito   JavaScript   React.js
HTML5   CSS3   Git   Linux   Jenkins
C++

PROJECTS

Hotel Galaxy   🔗 ⌂

Java, Spring Boot, Mysql, JavaScript, React js
- User-friendly interface for quick room reservations with instant confirmation, ensuring a seamless booking experience.
- Managed reservations, guest profiles, and room inventory with real-time updates and secure payment integration.

E-Commerce-Styling   🔗 ⌂

Java, Spring Boot, Mysql, JavaScript, React js
- Robust search capabilities and customizable filters streamline product discovery, enhancing user experience and facilitating precise purchasing decisions.
- Ensures secure transactions with SSL encryption and PCI compliance, safeguarding customer payment information.

ACHIEVEMENTS

- **6 STAR Coder** at HAckerRank and 400+ questions on leetcode.
- Rewarded in R&R for working on cypress certification and completing the activity before the deadline
- Recognized as an outstanding performer and got star rating for working on custom code certification.
- Full Stack developer certificate 🔗

EDUCATION

Jabalpur Engineering College
Bachelor of technology,Information technology

📅 August 2017: May 2021

CGPA:6.8/10
